## OBSERVATIONS

OF THE

## AGRICULTURAL STATISTICS OF IRELAND,

FOR THE YEAR 1868.

TO HIS EXCELLENCY JOHN POYNTZ EARL SPENCER, K.G.

Esq.,

Esq.,

Esq.,

LORD LIEUTENANT-GENERAL AND GENERAL GOVERNOR OF IRELAND.

MAY IT PLEASE YOUR EXCELLENCY,

On the 17th of August, 1868, I had the honour of submitting to the Lord Lieutenant a return of the acreage under flax in Ireland in 1867 and 1868 by Counties and Provinces, and, in September following, General Abstracts of the extent of land under the various crops, and the number and description of live stock in the same years.

Tables giving the *estimated average produce* of the crops in 1867 and 1868 in each County and Province; and the number, ages, and sexes of the emigrants from Ireland during the year 1868; also the number and position of scutching mills in that year, were furnished to your Excellency in March, 1869.

I now beg to submit the more detailed tables, with the number and size of the holdings, the extent of land under each crop, and the revised numbers and description of live stock on the different classes of holdings, by baronies and poor law unions in 1868; also tables showing the number and position of mills used for scutching flax.

## PART I.—TILLAGE.

The acreage under tillage, grass, fallow, plantations, and of "bog and waste unoccupied," in 1868, according to the returns received, was as follows:—

| Under Crops, including Meadow and Clover, . . . . . | Acres.    | Division of land. |
|---|-----------|-------------------|
| " Grass, or Pasture, . . . . .                      | 5,547,971 | "                 |
| " Fallow, . . . . .                                 | 9,999,303 | "                 |
| " Woods and Plantations, . . . . .                  | 25,119    | "                 |
| " Bog and Waste, unoccupied, . . . . .              | 322,288   | "                 |
|   | 4,438,192 | "                 |

Of the entire surface of the country, omitting the areas of the larger lakes, rivers, and tide-weys, 27·3 per cent. is stated to have been under crops of various kinds; 49·2 per cent. was occupied by pasture; 0·1 per cent. was fallow; 1·6 per cent. under woods and plantations; and 21·8 per cent. bog and waste unoccupied. See Table IX., page xiii.

In the proportionate extent of land under the principal crops there was but little variation in 1868 compared with 1867. Wheat occupied 5·1 acres in every 100—an increase of 0·3 per cent.; oats 30·7 acres—an increase of 0·3 per cent.; potatoes 18·6—an increase of 0·3 per cent.; and meadow and clover 30·5—being an increase of 0·1 per cent. Turnips occupied 5·8 acres in every 100—a decrease of 0·3 per cent., and flax 3·8 acres—being a decrease of 0·2 per cent. The area under the several crops and the proportion of each crop to every 100 acres under tillage, are given in Table I.

Increase or decrease per cent. in land under crops.

Number of Holdings.

In many instances landholders occupy more than one farm, it has been therefore considered desirable to ascertain the number of landholders having more than one holding; a special Form was accordingly prepared, in which the Enumerator was required to enter the names of those who had two or more farms, together with the area of each holding, and the locality in which it was situated.\* The numbers are given in Table VI. by counties and provinces. On comparing the results in this table with the figures in the preceding one, it appears that in 1868 there were 594,341 separate holdings in the hands of 538,343 occupiers.

The number of separate holdings, and the number of occupiers in each Province were as under in 1868 :—

The quantity of land, held by each class of occupiers, with the acreage and proportion under crops, grass, fallow, plantation, and bog or waste is given in Table IX.

Of the total number of holdings 28.9 in every 100 are from 5 to 15 acres in extent, 23.0 from 15 to 30, and 12.1 per cent. above 30 to 50 acres. Sixty-one in every 100 acres of the land comprising the farms above 500 acres are bog and waste. As the farms diminish in size the proportion under bog and waste decreases, until it amounts on the smallest holdings to 8.7 per cent. The average extent of the holdings not exceeding 1 acre is 2 roods and 1 perch, and of farms above 500 acres 1,335 acres, 2 roods, and 6 perches.

The number of holdings; the quantity of land held by each class of landholders; the area and proportion under crops, grass, fallow, woods and plantations, and bog and waste, and also the average extent of the holdings, are given in the following table:

The following are extracts from my Report on the estimated average produce of the crops grown in 1868.

"Compared with 1867, the Returns for 1868 show an increase of 94,312 acres under the principal crops.

"In the principal cereal crops, wheat has increased by 24,116 acres, and in the yield 2.2 cwt. per acre; oats by 41,134 acres—the produce per statute acre being the same in 1868 as in 1867. Barley increased by 15,317 acres, and by 1.4 cwt. per acre. Bere and Rye by 304 acres, and 0.7 cwt. per acre. Taken together, the total estimated produce of the principal cereal crops was 9,491,186 quarters, being an increase of 558,381 quarters in 1868, as compared with 1867.

"In green crops, potatoes increased by 32,900 acres, and the yield 0.8 tons per acre, mangel wurzel by 292 acres, and 0.2 tons per acre, and cabbage 5,837 acres, and 0.8 tons per acre. Turnips decreased by 15,634 acres, and the produce by 0.6 tons per acre. The total produce of potatoes, turnips, mangel wurzel, and cabbage in 1868 amounted to 8,141,900 tons, showing an increase of 619,920 tons when compared with the previous year.

"Flax decreased by 46,774 acres, and the average produce by 5.0 stones per acre. Hay shows an increase of 33,800 acres, but a diminution in the total produce of 199,121 tons in consequence of a decrease in the yield of 0.2 tons per acre in 1868.

The mortgage  
under Crops,  
and esti-  
mated  
average  
produce in  
1887 and  
1888.

"The acreage under the principal crops in 1867 and 1868, and the increase or decrease in the latter year, are given in Table X.; the estimated average produce per acre and the total yield are shown in Tables XI. and XII.; a comparison of the average produce of the crops per acre in each county and provinces in 1867 and 1868 is given in Table XIII.; and in Table XIV. the extent under the principal crops, the estimated yield per acre, and the total produce, are exhibited for the series of years from 1851 to 1868, inclusive.

#### "METEOROLOGICAL OBSERVATIONS.

Meteo-  
logical  
observa-  
tions.

"In connexion with the Agricultural Statistics, I beg to give the following abstract (Table VI.) of the Meteorological Observations registered at the Ordnance Survey Office, in the Phoenix Park, during the year 1868, for which I am indebted to the courtesy of Captain Wilkinson, R.E.

"The barometer stood highest in 1868, on the 11th of February, at 9.30 P.M.,—wind calm—when it was 30.865 inches; it was lowest at 9.30 A.M., on the 27th December,—wind S.W.—when it was 28.735 inches. The highest temperature in the air during the year was 88.4 degrees of Fahrenheit, on July 21st, and the lowest 22.6 degrees, on January 3rd. Rain or snow fell on 183 days. The greatest quantity of rain which fell in a day (24 hours) was 1.334 inches on the 25th of September—the wind being N.E. The point from which the wind chiefly prevailed was from the S.W.; it blew from that direction 124 days, with an average pressure 4.81 lbs. per square foot. The strongest wind was from the S.W., on the 10th of December, when the pressure was 25 lbs. per square foot.

I have only to add that the members of the Royal Irish Constabulary and Metropolitan Police who were selected to act as enumerators, discharged their duty in their usual efficient manner.

I have the honour to be, my Lord,

Your Excellency's very faithful servant,

Wheat and Rye were included in the same column as the Barley up to the year 1851. The produce of Potatoes in 1847 was estimated at 45 statute per statute acre. There was not any record of Potatoes for 1848, as the record of land under that crop was entered under the head of "Green Grass" in the Statute's returns.
